

Jatheon Technologies Inc. is looking for:

Junior Java Software Engineer

If you are passionate about Java, eager to learn more and if you are somebody who wants to work in a dynamic team, face new and exciting engineering challenges on a daily basis, wants to dig deep into big data and Elasticsearch, someone who wants to be in a team where more time is spent thinking how to **optimally** solve a problem than on writing code and someone who wants to work on a project that really makes a difference than you are the right person for us!

Job description and responsibilities:

As a Java software engineer you will be working in agile team on design, implementation and maintenance of software onboard the data archiving appliance. You will be in charge of producing high quality software design to support long-term maintainability and extensibility of the Jatheon archiving software.

The role requires a team player who enjoys technical challenges within a fast paced environment, applies sound judgment in successful task planning and execution, meets deadlines, and communicates the highest standards of professionalism in his/her work habits. This is a full time, **work from home** position with flexible hours.

Job requirements:

- Ability and desire to learn new concepts and tools
- University degree in computer science (or equivalent)
- Solid understanding of computer science fundamentals
- Problem solving skills
- Organizational and time management skills
- Knowledge of core java
- Knowledge of object-oriented design
- Knowledge of SQL
- Basics knowledge of Linux

The ideal candidate would have:

- Professional experience in Java software development
- Knowledge of Elasticsearch and/or Lucene
- Experience working on all the cycles of software development
- Experience with agile methodologies
- Experience with Java build tools

PLEASE SUBMIT CV IN ENGLISH.

About the company:
